PRISON GUARD

Intercom System

Complete intercom system solution for penitentiary facilities. It's goal is to enable verbal communication between incarcerated and wardens. Thanks to modern construction the system is easy to expand via adding additional modules. Panels and controllers are connected to the intercom central with a communication bus creating a modern system which records conversations and creates a log of events for as many as 125 different rooms. The intercom centre is equipped with a touchscreen panel and a user friendly interface.
